

## DDS Logistics selected as a Top 100 Logistics IT Provider

When choosing the 2021 Top 100 Logistics IT Providers, Inbound Logistics editors looked at excellence in optimizing supply chain, logistics and transportation operations. Strategically, editors make their selections based on how transformative solutions impact those business activities driving integration across internal and external business processes. DDS Logistics was selected because its solutions solve specific logistics challenges and improve processes, and create a ripple effect of enterprise efficiencies across the entire value chain.

The business disruptions of the past year remind businesses to focus like a laser beam on improving enterprise operations through investments in technology. The challenges are many and are now top of mind. Improving end-to-end visibility, achieving closer integration with value chain partners, finding efficient sources of transport lift, nailing down chain of custody and sustainability concerns to limit liability, inventory scalability have clearly become survival issues for many. DDS Logistics was selected as a Top 100 Logistics IT Provider because its solutions address these critical needs and help companies move along the continuum to truly becoming demand driven enterprises.

DDS Logistics continues to provide the technology solutions Inbound Logistics readers need to achieve the visibility and control that drives successful supply chains. As shippers, carriers, and 3PLs increase their use of logistics IT, DDS Logistics stays flexible and responsive, anticipating the evolving needs of both customers and the market. Inbound Logistics is proud to honor DDS Logistics for innovative solutions empowering logistics and supply chain excellence in 2021.

As business leaders struggle to balance the need for advance planning against the demands for supply chain agility, fewer inventory touches, and managing the complexity of omni-channel and e-commerce distribution regimes, DDS Logistics continues to provide solutions to help meet those challenges. And that's why Inbound Logistics editors have recognized it as one of 2021's Top 100 Logistics IT Providers.

**Every April, Inbound Logistics editors recognize 100 logistics IT companies that support and enable logistics excellence. Drawn from a pool of more than 400 companies, using questionnaires, personal interviews, and other research, Inbound Logistics selects the Top 100 Logistics IT Providers who are leading the way in 2021. Editors seek to match readers' fast-changing needs to the capabilities of those companies selected. All companies selected reflect leadership by answering Inbound Logistics readers' needs for scalability, simplicity, fast ROI, and ease of implementation.**

#### **About Inbound Logistics**

Since its inception in 1981, Inbound Logistics' educational mission is to illustrate the benefits of demand-driven logistics practices, give companies the knowledge to help them match the inbound flow of materials to their demand, and align their business process to support that shift.

Inbound Logistics offers real-world examples and decision support to guide businesses to efficiently manage logistics, reduce and speed inventory, offset rising transport costs, and balance transport needs with demand, supporting business scalability across their value chain.

**More information about demand-driven logistics practices is available at [www.inboundlogistics.com](http://www.inboundlogistics.com).**

#### **About DDS LOGISTICS**

Founded in 1984, DDS Logistics specializes in software for the organization and management of transport and international sourcing. DDS Logistics is the market leader in France for TMS (Transport Management System) and offers a range of solutions for the digitization of transport, covering all areas of the supply chain, both domestic and international. Our collaborative solutions provide flow visibility and cost control throughout the transport chain.

DDS Logistics solutions are designed for manufacturers, distributors, importers, exporters and logistics service providers and guarantee a rapid return on investment: lower transport costs, reduced inventory through better control of the supply chain, control of lead times and service quality, etc.
